PROFESSIONAL SUMMARY

Backend focused Java Developer with hands on experience in Java, Spring Boot, Spring Security, REST APIs, Hibernate, JPA, and MySQL. Experienced in building layered backend applications, secure REST APIs, role based systems, and database driven applications. Strong foundation in OOP, Data Structures and Algorithms, and solving real world problems through software.

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript

Backend: Spring Boot, Spring Security, REST APIs, Hibernate, JPA

Frontend: HTML, CSS, JavaScript

Database: MySQL, Firebase

Cloud / Deployment: Firebase Hosting, Docker, Vercel

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Linux, Maven, IntelliJ IDEA, VS Code, Postman

PROJECTS

SmartWaste Management System

React.js, Flask, Firebase, Docker

- Developed a multi role waste management platform enabling citizens to report waste problems with location and photos, with separate User, Cleaner, and Admin dashboards for report tracking, cleanup task assignment, and system management.
- Built Flask REST APIs with Firebase Authentication and Firestore for secure role based access and real time data updates; configured production deployment using Docker, docker compose, Firebase Hosting, Netlify, and Vercel.

Vehicle Rental Platform

Java, Spring Boot, Spring Security, REST APIs, Hibernate, JPA, MySQL

- Developed an online vehicle rental application with user registration, vehicle details, booking, rental records, and return workflows using validation and relational database management.
- Built an admin dashboard to manage vehicles, pricing, availability, users, and rental operations with CRUD functionality; implemented authentication, role based authorization, and RESTful APIs using Spring Security and layered architecture.

Hospital Queue and Appointment Platform

React.js, Django, Python, Firebase

- Identified long waiting times and uncertainty around hospital consultations and developed a digital queue management solution enabling patients to schedule appointments and track queue position and consultation status.
- Contributed to REST APIs and role based access for patients, doctors, and administrators to manage appointments and queue operations; developed the project as a team and presented it at the Srinathan 2.0 National Level Hackathon.

PROFESSIONAL EXPERIENCE

Software Engineering Intern

2025 – Present

Algorithm#365

Remote

- Strengthened Java programming and problem solving skills through regular Data Structures and Algorithms practice.
- Applied Object Oriented Programming and time and space complexity analysis to improve solution quality.

Software Development Intern

2025 – Present

WebQraft Solutions

- Contributed to backend application development by implementing REST APIs and improving application functionality.
- Used Git and GitHub for version control, feature development, debugging, and collaborative development.

LEADERSHIP & INVOLVEMENT

Technical Lead – Open Source Club, KVG College of Engineering

2026 – Present

- Mentored junior students in programming, Git/GitHub, backend development, and open source technologies through hands on guidance and technical workshops.
- Organized technical workshops and coding sessions to help students build practical development skills and understand software engineering practices.
- Contributed to developing websites for college activities and functions, supporting digital communication and event related requirements.

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

Expected May 2027

KVG College of Engineering, Sullia

CGPA: 7.7/10

PUC – SANVI PU College, Konanur

2021 – 2023

SANVI PU College, Konanur

Percentage: 86.5%

ACHIEVEMENTS

Hackathons: Top 5 Finalist among 52 teams at MIT Mysore Hackathon; National-Level Hackathon Participant – Srinathan 2.0 Hackathon.

Recognition: Certificate of Acknowledgement – Bharatiya Antariksh Hackathon organized by ISRO.

Problem Solving: Actively solving Java and Data Structures & Algorithms problems on LeetCode.
